

REARO **STERITOP**

**HYGIENIC HTM63 WORKTOPS**  
PERFECT FOR HEALTHCARE & LABORATORIES

# Meeting the Standard in Sterile Surfaces

## The Rearo STERITOP Advantage

### Understanding HTM63: The Standard for Clinical Surfaces

When specifying work surfaces for clinical and laboratory environments, compliance with official guidelines is not just best practice; it's a critical requirement for patient and staff safety.

### What is Health Technical Memorandum (HTM)?

Health Technical Memoranda (HTMs) are comprehensive documents that provide authoritative guidance on the design, installation, and operation of specialised building and engineering technology used within the NHS and wider healthcare sector. They set the definitive standards for quality, safety, and performance.

### HTM63: Focus on Work Surfaces

HTM63 specifically outlines the stringent requirements for work surfaces and shelving in clinical environments. It covers every aspect of performance, from strength and stability to cleanability and resistance to chemicals and wear.

Our new STERITOP range is meticulously manufactured to meet and exceed these rigorous standards, ensuring a surface you can trust in the most demanding settings.

### Key HTM63 Compliance Features of STERITOP:

- Durable and non-porous: A seamless, high-pressure laminate surface prevents the absorption of fluids and harbouring of bacteria.
- Easy-clean and hygienic: The smooth, impervious finish allows for effective and rapid decontamination.
- Resistance to wear: Highly resistant to abrasions, impacts, and staining from chemicals and cleaning agents.
- Strength and stability: Manufactured to conform to the performance recommendations of BS 3202-2:1991.
- Fire rated: Laminate surface achieves a Class 1 (or Class 2) Surface Spread of Flame rating when tested in accordance with BS 476-7:1997.
- Quality assured: All products are manufactured under our ISO 9001 certified quality management system.

## Why STERITOP?

- **Quality assured:** Our ISO 9001 certification guarantees consistent quality and reliability
- **Fire rated:** laminate surface achieves a Class 1/Class 2 surface spread of flame rating
- **Hygienic and easy-clean:** non-porous, seamless laminate surface prevents bacterial ingress
- **Durable and resilient:** highly resistant to wear, abrasion, stains, and chemical spillages
- **Fully compliant:** manufactured to meet the performance requirements of BS 3202-2:1991 for strength and stability

# VERSATILE APPLICATIONS FOR STERITOP WORKTOPS

The uncompromising hygiene and durability of STERITOP make it the ideal choice for any setting where a sterile, robust, and easy-to-maintain surface is essential

### HOSPITALS & CLINICS:

Perfect for operating theatre prep rooms, scrub areas, consultation rooms, and treatment suites where infection control is paramount.

### GP SURGERIES:

Ideal for examination rooms, minor procedure areas, and dispensing zones, offering a durable surface that withstands constant cleaning.

### DENTAL PRACTICES:

Suited for clinical worktops, instrument staging, and laboratory areas, providing resistance to chemicals and autoclave condensation.

### EDUCATION & TRAINING ROOMS:

Provides a robust, real-world clinical surface for medical and dental training facilities, teaching the next generation of professionals.

### LABORATORIES & RESEARCH FACILITIES:

Meets the demands of scientific environments with excellent resistance to a wide range of chemical spillages and stains.

# STERITOP

# Technical Specifications

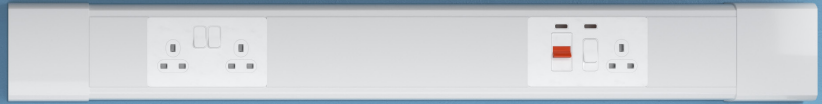

---

<b>PRODUCT NAME:</b>	Rearo STERITOP HTM63 Worktop
<b>BRAND:</b>	Rearo
<b>STANDARD:</b>	Complies with Health Technical Memorandum 63 (HTM63) and HTM67
<b>APPLICATION:</b>	Healthcare, clinical, laboratory, and education environments. Specifically: GP Surgeries, Hospitals, Consultation Rooms, Treatment Rooms, Clinics, Dental Practices, Laboratories.
<b>CONSTRUCTION:</b>	Laminate-faced chipboard core
<b>TOTAL THICKNESS:</b>	40mm
<b>FRONT EDGE PROFILE:</b>	Bullnose (postformed)
<b>UPSTAND:</b>	50mm integrated double-postformed upstand.
<b>SHORT EDGE FINISH:</b>	Lipped with matching laminate. Loose laminate can be supplied for customer application
<b>STANDARD LENGTHS:</b>	650mm stock & bespoke available made to order
<b>CORE MATERIAL:</b>	38mm Chipboard (subject to specific grade and fire performance requirements).
<b>FACE MATERIAL:</b>	High-Pressure Laminate (HPL). Matte finish.
<b>KEY PROPERTIES:</b>	Durable, resistant to wear, easy-clean, non-porous, smooth surface
<b>FIRE RATING:</b>	Laminate surface spread of flame: Class 1
<b>STRENGTH/STABILITY:</b>	Conforms to performance, strength, and stability recommendations of BS 3202-2:1991
<b>QUALITY ASSURANCE:</b>	Manufactured under ISO 9001 certification
<b>SUSTAINABILITY:</b>	FSC-certified core materials (where applicable)
<b>MANUFACTURING:</b>	Made in Britain

# The safest and most effective choice for critical environments

Where absolute hygiene and a seamless finish are non-negotiable, STERITOP PLUS is the definitive solution. This premium, man-made material is engineered to eliminate the risks inherent in traditional surfaces, making it the ultimate choice for private healthcare, dental surgeries, and high-specification laboratories.

## ENGINEERED FOR PERFORMANCE AND HYGIENE

STERITOP PLUS is a clear step-up from laminate. As a completely non-porous material, it prevents the growth and penetration of bacteria and mould, eliminating the risk of bacterial harbourage. These superior hygiene credentials are combined with exceptional durability against heavy wear, harsh cleaning products, and staining from chemicals or blood.

## SEAMLESS PERFECTION

Our core technology delivers seamless integration. We create joint-free lengths for uninterrupted runs, customising installations to eliminate joints between worktops, backdrops, and moulded sinks. This seamless finish is not only aesthetically luxurious, but also a critical barrier against microbial growth at seams and angles.

## FABRICATED FOR FLEXIBILITY

All STERITOP PLUS worktops are built locally in the UK on a stable timber frame. We supply sheet material and specialist adhesives, enabling both off-site fabrication and on-site joining or repair. Minor scratches can be sanded out on-site, ensuring long-term perfection. Stocked as 3000mm x 650mm x 40mm blanks, our material is versatile for any application.

HTM compliant and application ready meeting the highest standards for hygiene and design, STERITOP PLUS is ideal for the most demanding environments:

- Hospitals and operating theatres
- Dental surgeries and clinics
- Laboratories and pharmacies
- GP surgeries and nurses' stations
- Receptions and washrooms

FEATURES	STERITOP PLUS
Max seamless length	Custom lengths (joint free)
Finish	Seamless, non-porous
Benefit	Hygiene and aesthetics
Ideal for	Healthcare, dental, high-specification

**HIGHEST STANDARDS FOR HYGIENE & DESIGN**  
IDEAL FOR THE MOST DEMANDING ENVIRONMENTS
